

Velo und öffentlicher Verkehr - Internationaler Workshop in Bern Diskussion zur Förderung der kombinierten Mobilität in Europa

Die optimale Verknüpfung des Veloverkehrs und des öffentlichen Verkehrs ist eine wichtige Voraussetzung zur Förderung der kombinierten Mobilität. Dazu bedarf es schlanker Schnittstellen (Abstellanlagen, Zugänge) und eines attraktiven Velomitnahme-Angebotes. Die IG Velo Schweiz widmete dem Thema einen internationalen Workshop. Dieser fand am 17. Mai in Bern am Rande der Jahresversammlung der European Cyclists' Federation (ECF) statt. Hier finden Sie die Referate. (Sprache: Englisch)

Vélo et transports publics – réflexion pour une mobilité combinée ProVélo Suisse accueille la Fédération cycliste européenne, à Berne

Dans le cadre de l'Assemblée générale de la European Cyclists' Federation (ECF) qui s'est tenue à Berne le 17 mai 2007, ProVélo Suisse a organisé un atelier de portée internationale sur le thème de la mobilité combinée entre vélos et transports publics. La problématique de la prise en charge des bicyclettes dans les trains européens, de même que les mesures favorisant la mobilité combinée, dans le trafic de tous les jours, sont des questions qui ont particulièrement retenu l'attention des participants. Vous trouverez ici une sélection d'exposés (langue : anglais)
