

Swiss Transport Research Conference Résultats de la conférence du 15 - 17 mars 2006, à Ascona

Un panel de chercheurs suisses et internationaux s'est réuni, du 15 au 17 mars, au Monte Verità, à Ascona pour débattre, dans le cadre de sessions thématiques consacrées à des questions aussi diverses que les comportements, la modélisation ou les impacts économiques dans le domaine des transports. Le forum a pour but d'aborder, de manière transversale, des thèmes liés aux transports et à l'aménagement du territoire, de stimuler la discussion au sein de la communauté scientifique, mais aussi de diffuser les résultats auprès des praticiens et des politiciens. Nous vous présentons, ci-après, quelques interventions parmi les nombreux et passionnant sujets discutés. (langue : anglais)

Swiss Transport Research Conference Ergebnisse der Tagung in Ascona vom 15. – 17. März 2006

Vom 15. bis 17. März 2006 trafen sich auf dem Monte Verità bei Ascona in- und ausländische WissenschaftlerInnen aus dem Bereich Transport und Raumplanung um sowohl über Verkehrsverhalten und Modellierung als auch über die ökonomischen Folgen zu debattieren. Das Themenspektrum war breit angesetzt und hatte einerseits das Ziel, die Diskussion auf wissenschaftlicher Ebene voran zu treiben und andererseits Ergebnisse für die Anwendung in der Praxis (Verkehrspolitik) liefern zu können. Der angefügte Link führt Sie direkt zu den spannenden Ergebnissen der diskutierten Themen. (Sprache: eng)

2006 Conference proceedings

Keynotes

Prof. Claudio Minca, School of Geography, Politics and Sociology, University of Newcastle:

Touring

Prof. Weert Canzler, Wissenschaftszentrum, Berlin:

Infrastructure investments in a shrinking society

Prof. David Banister, The Bartlett School of Planning, University College London

Sustainable urban development and transport

Regular presentations

Session Mobility

Beige, Axhausen (ETHZ):

Long-term mobility decisions during the life course

Craviolini(UNI-Z):

Commuting behaviour as a part of lifestyle

Löchl(ETHZ):

A hedonic rent price model for residential housing

Session Engineering and Safety

Tan (ITRA):

SJDesigner: A powerful tool for signalised junction design

Arraigada, Partl (EMPA):

Calculation of displacements from measured accelerations, analysis of two accelerometers and application on road engineering

Zwanenburg (EPFL):

Modelling degradation processes of switches and crossings for maintenance and renewal planning on the Swiss railway network

Jemelin (EPFL):

[How do motorists react to long road works? The case of Glion Tunnel](#)

Santel (ETHZ):

[Traffic flow and accident occurrence in construction zones on freeways](#)

Session Modelling 1/DCM

Erath (ETHZ):

[Value of travel time savings for shopping trips in Switzerland](#)

Hackney (ETHZ):

[Results of discrete choice models for long-distance travel based on the DATELINE survey](#)

Antonini, Bierlaire (EPFL):

[Modelling pedestrian interactions with discrete choice models/a>](#)

Hess, Vrtic, Axhausen (ETHZ):

Comparative estimates of the value of time savings

Session Public Transport

Chevroulet(EPFL):

Free public transport access to superstores in Japan: who's in charge of what?

Nash (ETHZ):

[Design of effective public transportation systems](#)

Reusser (ETHZ - Uni-Göteborg):

[All aboard! Towards an assessment of sustainable development options of railway stations](#)

Session Land Use

Bürgle (ETHZ):

[Household location choice model for the Greater Zurich area](#)

Löchl (ETHZ):

Land use effects of road pricing - a literature review

Maggi, Marti(USI-Ecoplan):

Identifying the pure transport effect in regional development: An economic analysis for Switzerland

Tschopp, Fröhlich, Axhausen (ETHZ):

[Accessibility development and its spatial impacts in Switzerland 1950 - 2000](#)

Session Modelling 2

Spassov, Bierlaire, Merminod (EPFL):

[Bayesian approach for indoor pedestrian localisation](#)

Hess, Bierlaire, Polak (ETHZ - EPFL - Imperial):

[Confounding between substitution patterns and random taste heterogeneity](#)

Hess, Axhausen, Polak (ETHZ - Imperial):

Distributional assumptions in Mixed Logit models

Steinmann, Kirchofer (UNI-Bern):

[Exploring a particular relationship.
Why the Swiss did hardly dismantle
their rail network since World War
II](#)

Session Economic Impact

Halsband, Hofmann (HSG):

Provision and commercialization of information in freight traffic

Schiffmann (ETHZ)

[Communal road networks in Switzerland: Form of new Public Private Partnership
\(PPP\)cooperations for the maintenance](#)

Session Modelling/Heuristic

Bert, Chung, Dumont (EPFL)

[Traffic-project: Micro - macro combination](#)

Steiner (ZHW):

[A heuristic method for aircraft maintenance scheduling with variable constraints](#)

Weimann, Barthels (HSL) :

[A framework for routing systems in the supply chain. Including the structure of vehicle routing problems](#)

Session Behaviour

De Haan (ETHZ)

Multi-agent modelling of the Swiss car market, and its potential reaction upon governmental incentive schemes to promote fuel-efficient cars

Rüetschi, Caduff, Timpf (UNI-Z), Schulz, Wolff (UNI - Karlsruhe):

[Network routing by landmarks](#)

Flamm (EPFL):

[The concept of personal network of usual places as a tool for analysing human activity spaces: a quantitative exploration](#)

Session Freight Transport and Logistics

Arnaud (EPFL):

[Towards a more sustainable modal and spatial split of freight traffic for crossing areas: the case of the transalpine freight traffic](#)

Fries (ETHZ):

[Cost structure and market potential in European intermodal transport on East-West axes](#)

Iannone (UNI-Naples):

A discrete choice model application for the Naples - Toulon sea motorways economic-technical feasibility evaluation

Patterson, Ewing, Haider (EPFL):

[The first carrier choice survey for the Quebec City - Windsor corridor: Shipper preferences suggest uphill battle for increasing rail freight market share](#)

Session Modelling 3

Fosgerau, Bierlaire (DTRI - EPFL):

[Extending and testing mixtures of the multinomial logit model](#)

Frejinger, Bierlaire (EPFL):

[Capturing correlation in route choice models using subpaths and subnetworks](#)

Thémens, Bierlaire (EPFL):

Solving singularity issues in the estimation of econometric models

Hess, Bierlaire, Polak (ETHZ - EPFL - Imperial):

[Discrete mixtures models](#)

Session Modelling 4/Micro

Balmer, Axhausen, Nagel (ETHZ, TU-Berlin):

A demand generation framework for large scale micro simulations

Charypar, Axhausen, Nagel (ETHZ, TU-Berlin)

Implementing activity-based models:
Accelerating the replanning process of agents using an evolution strategy

Session Transport Economy and Markets

Lalive, Schmutzler (UNI-Z):

[Competition for railway markets: The case of Baden-Württemberg](#)

Müller (ETHZ):

Modelling car size loyalty and car brand loyalty in Switzerland

Kato, Matsumoto (ETHZ - UNI-Tokyo):

[Joint resource allocation model of household members consisting of a husband, a wife and a child for non-work activities](#)

Peters (ETHZ)

Side effects of bonus payments designed to influence card choice behaviour

Session Environment

Bhaskar, Chung, Dumont (EPFL):

[Study of vehicle noise for different operating conditions](#)

Trocmé (Buwal):

[Habitat fragmentation due to linear transportation infrastructure: An overview of mitigation measures in Switzerland](#)

Meister, Balmer, Axhausen, Nagel
(ETHZ - TU-Berlin)

[planomat: a comprehensive scheduler for a large-scale multi-agent transportation simulation](#)

Bernard (ETHZ):

[Correlation of link travel speeds](#)

Rudel (USI):

Reduction potential of external costs of different vehicle categories in Ticino

For further questions please contact [Roman Rudel](#).
