

Mobility-Flex

The car sharing scheme for your business

mobility
car sharing

Mobility-Flex enables you to open a car sharing station at your company headquarters in no time, giving your employees trend-setting, low-cost mobility. And the best thing of all: the more the car is used, the less you pay.

It's this simple:

- Mobility supplies the vehicle category of your choice at the desired location.
- You provide the parking space (and an electric charging station if required). Mobility takes care of marking the parking space.
- The car can be reserved by your staff and all Mobility customers. A personal Mobility Card is issued for use as a key.
- On request you can block the car at certain times for use by your staff, guaranteeing exclusive access.

The more the car's used, the lower the price

You pay an annual charge. In return, you are credited with the sales generated by the Mobility vehicle.

This is how much you get back:

- 100% of business-related sales generated by your staff
- 75% of sales generated by all other Mobility customers

So in the best-case scenario you end up paying nothing at all for Mobility-Flex.

Mobility-Flex

The car sharing scheme for your business

Enjoy a wide range of benefits

Convenient and ecological

- You avoid the expense and bother of private car ownership
- Optimum use of capacity
- Reimbursement of sales generated

Flexible

- On request: exclusive use at fixed times
- Combined travel: cover lengthier distances by train and use Mobility for the "last mile". This guarantees maximum efficiency in terms of both time and cost.

Safe and clean

- Mobility cleans and maintains all its vehicles on a regular basis.

Attractive

- Optimise your expenses system: with a Mobility vehicle, there's no longer any need for private mileage to be paid for, and all insurance issues are dealt with.
