

Mobility-Flex

The car sharing scheme for your residential complex

mobility
car sharing

Mobility-Flex enables you to open a car sharing station on your residential complex in no time, giving your residents trend-setting, low-cost mobility. And the best thing of all: the more the car is used, the less you pay.

It's this simple:

- Mobility supplies the vehicle category of your choice at the desired location.
- You provide the parking space (and an electric charging station if required). Mobility takes care of marking the parking space.
- Mobility issues free subscriptions to all residents who wish to sign up.
- Mobility provides free advertising material.
- The car can be reserved by your staff, the residents and all Mobility customers. A personal Mobility Card is issued for use as a key.

The more the car's used, the lower the price

You pay an annual charge. In return, you are credited with the sales generated by the Mobility vehicle.

This is how much you get back:

- 100% of business-related sales generated by your staff
- 75% of sales generated by residents and all other Mobility customers

So in the best-case scenario you end up paying nothing at all for Mobility-Flex.

Mobility-Flex

The car sharing scheme for your residential complex

Enjoy a wide range of benefits

An ecological solution that reduces traffic

- Saves private parking spaces, thereby cutting construction costs
- Studies show that one Mobility car takes the place of 10 privately-owned cars.
- More open space and green areas available

Flexible

- Your residents not only have access to the Mobility vehicles at the complex but also at all the other 2,950 stations throughout Switzerland.

Safe and clean

- Mobility cleans and maintains all its vehicles on a regular basis.

Attractive

- Increased marketing potential for your residential complex
- Free Mobility subscriptions are included for all residents who wish to sign up.
